"Our food was good—Bear steak, flapjacks, fresh bread, etc., but nothing seemed to warm and strengthen us as much as a cup of ARIOSA Coffee, which we kept in the original package and ground as needed." From a gentleman now in Bethlehem.

Arbuckle's ARIOSA was the first roasted packaged coffee, — packaged for the consumer's protection and the pores of each berry sealed after the roasting with fresh eggs and sugar to keep the goodness in and make the coffee settle clear and quickly.

Talk about "roasted fresh daily," the way to get a cup of coffee that tastes like coffee, with all the delicious flavor and aroma intact, is to buy Arbuckle's ARIOSA and grind it as you want to use it. Warning is a little develops the flavor and

THEY DRANK ARBUCKLES  
DEEP AND OFTEN, AND IT  
MADE THEM GREAT

makes the grinding easy. Coffee loses its identity as coffee after being ground or when exposed to the air.

Never buy loose coffee out of a bag, bin or tin. If it were good the roaster would not be ashamed to sell it in a package with his name on it.

The sales of Arbuckle's ARIOSA exceed those of all the other packaged coffee combined. It is the best coffee for you, and costs you less.

If your grocer won't supply, write to ARBUCKLE BROS., New York City.

## ARMY AND NAVY NEWS

### The Use of Detective Methods Frowned on in Navy Department.

Albert A. Roebber, chief yeoman of the navy, was recently convicted by court-martial on the Asiatic station of improper manipulation of the paymaster's books on which he worked, and sentenced to three years' confinement with loss of pay and allowances.

It appears from the report of the judge advocate general in this case that when the chief yeoman was suspected of peculation the paymaster by whom he was employed permitted the irregularities to proceed with the view of securing additional evidence for the conviction of the offender. The action taken by the ship's officers was disapproved by the Secretary of the Navy, in his indorsement of the case Secretary Bonaparte said:

"While extraordinary conditions may sometimes arise that would justify the adoption of quasi-detective methods in order to obtain the necessary evidence to conclusively establish guilt, the department in general does not advise or favor such methods, and in this particular case does not approve the methods adopted by authority of the commanding officer of the El Com, with the concurrence of higher authority, for the purpose of obtaining knowledge of specific acts of the accused. Any system of espionage which, in effect, amounts to an encouragement by persons in authority of the commission of unlawful acts by others in order to bring about a conviction, is emphatically disapproved."

#### All Ready for the President.

The battleship Louisiana, which is to take President and Mrs. Roosevelt to Panama and Porto Rico, is reported to the Navy Department by Capt. Couder, commanding, to be in first-class shape, after having been altered to accommodate the presidential party. She was docked at the New York navy yard about two weeks ago and since that time she has been thoroughly cleaned and overhauled, many repairs being needed as a consequence of her rough voyage through Havana some weeks ago when she brought Secretary Taft and party back to this country. The Louisiana will sail from New York tomorrow for Tripoli, in Chesapeake bay, where the chief executive will be transferred from the Mayflower, which vessel will take him from Washington.

#### Cannot Pay Quarantine Fees.

The quarantine charges recently imposed on army transports by the quarantine authorities of the state of Virginia will not be paid by the War Department, and instructions to that effect have been sent to the transport authorities. While a public vessel of the United States is required to submit to inspections they do not, and cannot, pay quarantine fees, and they are instructed to that effect have been sent to the transport authorities. While a public vessel of the United States is required to submit to inspections they do not, and cannot, pay quarantine fees, and they are instructed to that effect have been sent to the transport authorities. While a public vessel of the United States is required to submit to inspections they do not, and cannot, pay quarantine fees, and they are instructed to that effect have been sent to the transport authorities.

#### Casualties in the Philippines.

Maj. Gen. Wood, commanding the Philippine division has given some statistics to show what the American occupation of the islands has cost in human life. From the records it appears that from the occupation of the islands to July 17, 1906, 3,884 soldiers and officers, regulars, have died in the islands; navy and marines, 207; scouts, 430; state volunteers, 571; United States Volunteers, 1,267; total, 6,342. Civilian employees, members of officers' families, ex-soldiers, ex-employees, convicts under military control and miscellaneous cases, since the occupation of the islands to July 17, 1906: Civilian employees, 479; civilians not employees, 490; total, 969. The victims, 876 were killed by the enemy, 536 died of wounds, 408 were drowned, 532 died of cholera, 315 of smallpox and 136 were suicides.

#### May Be Named Flusser.

It has been suggested to Secretary Bonaparte that one of the new torpedo boats be named Flusser, in honor of Lieut. Commander Charles Williamson Flusser, a native of Maryland and an illustrious naval officer in the civil war, who, while in the command of the Miami, in the fight with the confederate ram Albemarle, lost his life by a shell from one of his own guns. He was the first officer to be buried in the Naval Academy cemetery at Annapolis. While the name of Flusser is rarely heard in these days, nevertheless, it is in the honor roll of heroes who, though of southern birth and kindred, remained loyal to the Union, and his associates still alive remember the brave deeds that earned for him the sobriquet of "Lion-hearted Flusser."

#### Christmas Gifts for Soldiers.

Arrangements are being made by the quartermaster's department of the army to transport to the Philippine islands and to Cuba, free of charge, Christmas boxes intended for the officers and enlisted men of the army, navy and Marine Corps serving on those distant stations. Boxes for the Philippine islands will be taken on the transport Thomas (or Buford) which will sail from San Francisco December 5. These boxes should be sent to San Francisco, Cal., care of the depot quartermaster there, with all express charges paid. They should be plainly addressed and plainly marked "Christmas Box." The boxes for Cuba should be sent in the same way.

#### Care in Handling Mines.

In order to guard against the possibility of accidents Secretary Bonaparte has issued a general order calling attention to the necessity of strict compliance with the instructions laid down for mining exercises, and directs that in all such exercises the mines be handled exactly as they would be in actual service, and that the person in charge be fully charged, whether such is the case or not.

#### To Encourage Marksmanship.

To stimulate the marines in rifle practice Secretary Bonaparte has issued a general order providing that every marine who qualifies as an expert marksman shall receive \$3 per month extra pay; those qualifying as sharpshooters \$2 per month and those rated as marksmen \$1 per month extra pay.

#### Warships to Carry Oil Fuel.

Notwithstanding the unsuccessful experiments made some time ago the Navy Department has again taken up the question of providing means for carrying oil fuel on the vessels of the navy. The department has received information that the British battleships are being fitted up to carry oil fuel in the compartments in the double bottoms.

#### Are Part of the Army.

Judge Advocate General Davis has rendered an opinion, which has been approved by the Acting Secretary of War, that enlisted men of the Philippine scouts are a part of the army within the meaning of section 4818, revised statutes, and are entitled as such to admission to the Government Hospital for the Insane, near this city.

#### Government Can Do It Cheaper.

Because of the unexpectedly heavy expense required for the repair of the U. S. gunns of The Star.

## ESTIMATE FOR ADDITION.

New Naval Hospital Proves to Be Inadequate.

The surgeon general of the navy includes in his annual report an estimate to cover the cost of the erection of an addition to the new Naval Medical Hospital, at the foot of 23d street, this city, symmetrical with the northeast pavilion, solarium and connecting corridor. This addition is considered essential to the completion of the hospital and necessary for the sufficient enlargement to accommodate its quota of patients. It is explained that the hospital as originally planned would have cost \$200,000, and that the plans had to be changed to meet the requirements of the appropriation of \$150,000.

The old Naval Hospital on Pennsylvania avenue east is to be employed as an annex to the new building, especially for infectious diseases. Wards have been arranged in the stable for the isolation of cases of contagious diseases and have proved very useful. The surgeon general says that the operating room is antiquated, but that with great attention to aseptic methods operations were performed in it with excellent results. During the year 361 patients were treated at the old hospital, and of that number 319 were discharged for duty.
